Asked questions in interview: Take down pain points in order to achieve a goal.

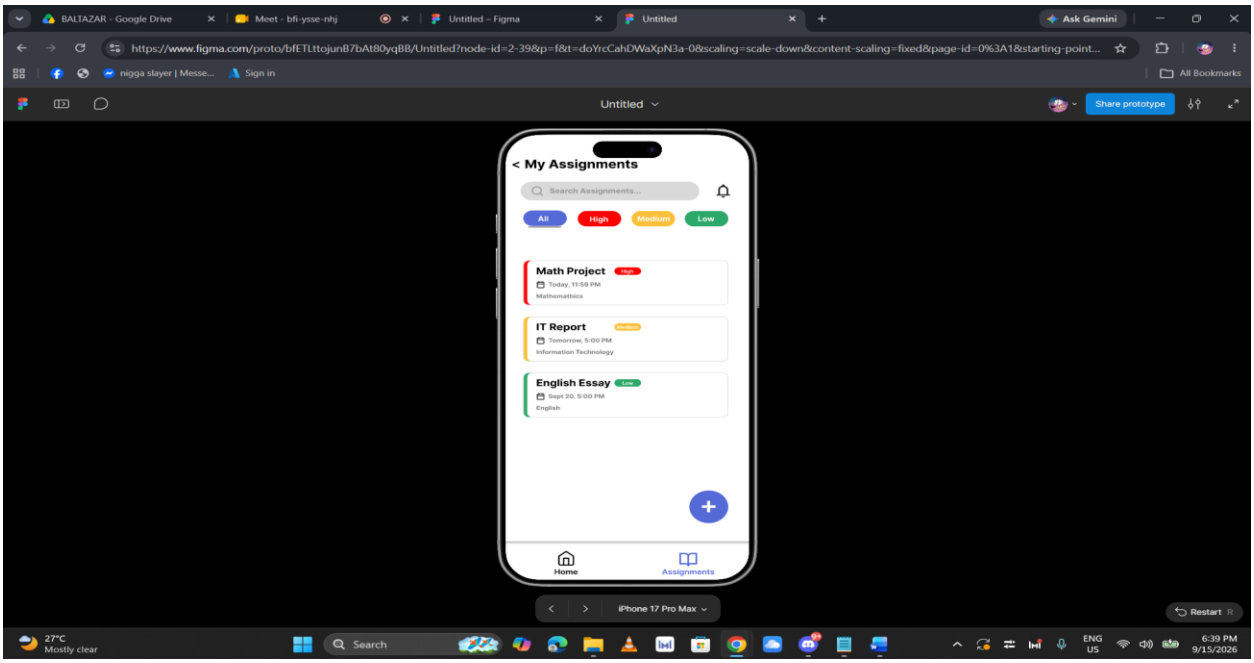

Landing Page: I created a landing page where I introduce my Assignment/Task Organizer.

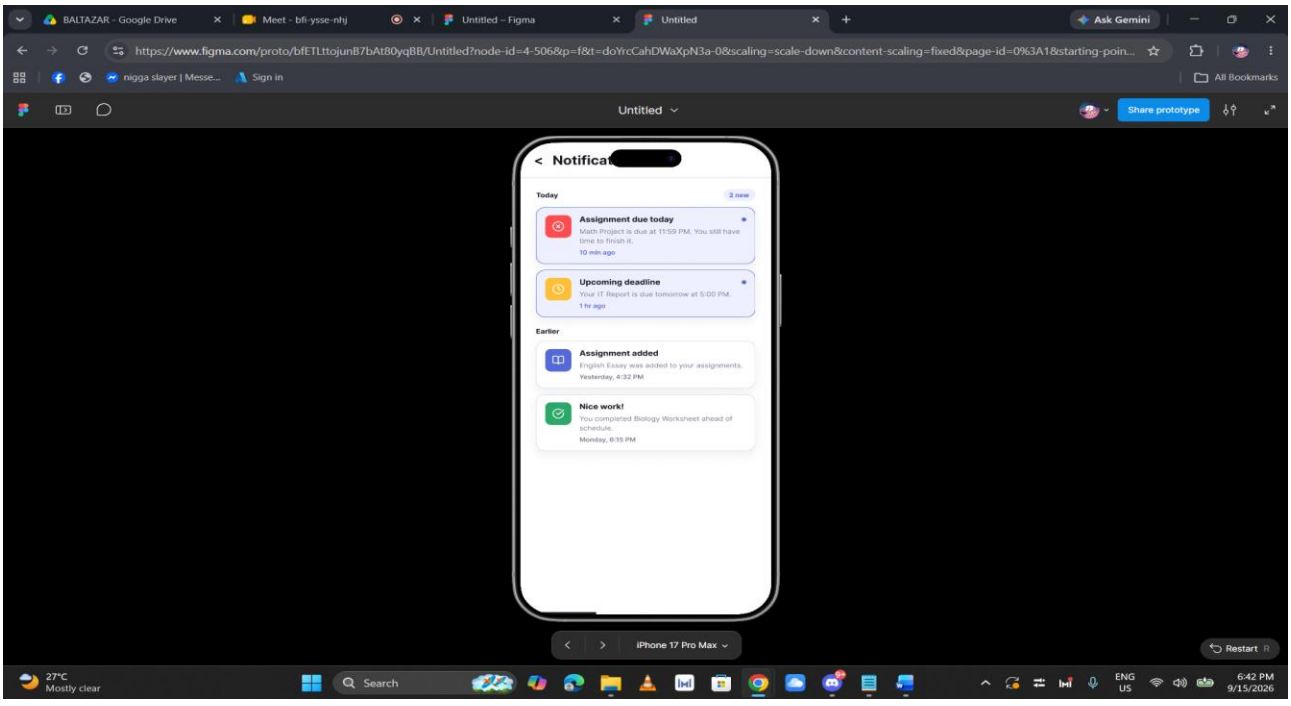

Home / Dashboard: A home page where you can see your to do lists and navigate to assignments, add assignments and a notification

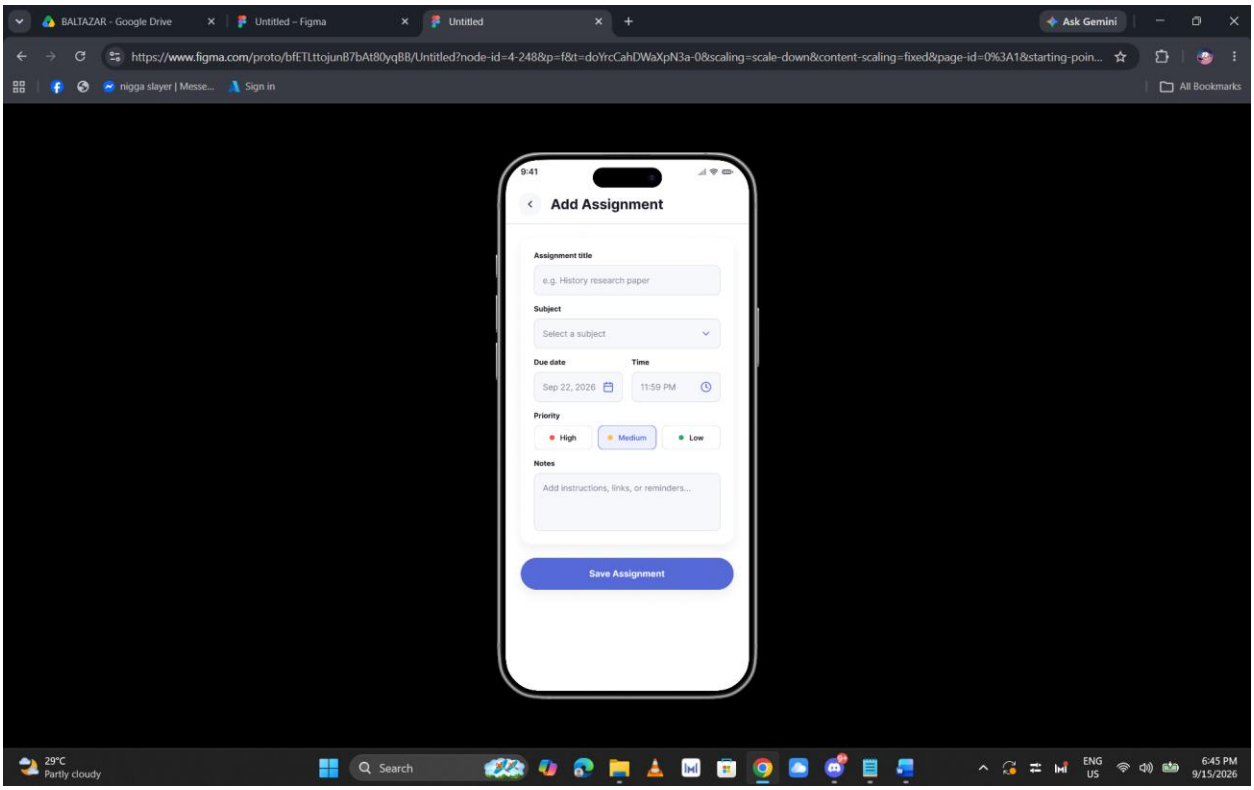

Assignment Page: This is where you can see your assignments based on their level of urgency whether its High, Medium, or low.

Notification Page: It will remind you about incomplete activities when their deadlines are approaching.

Add Assignment Page: This page they can add an assignment and can put some notes in order to answer the assignment correctly.

Application Feedback:

Testers	Feedback
Tester 1 (Rab)	**“App does not accommodate my phone size so the bottom bar cannot be seen”**
Tester 2 (Carlo)	**“Home Buttons are not yet connected”**
Tester 3 (Ethan)	**“The texts are scattered due to my phone size, and some buttons are missing”**

Reflection:

It’s my first time using Figma, so it’s a challenge for me, but instead of giving up, I felt excitement. Then, I sought help from my friend who has the knowledge and taught me the basics, then let me figure out alone the functions of each button and where to find them. I also learned that clients have pain points that I need to innovate in order to produce a quality product, or in other words, to achieve a certain goal.
